

Registration of Prefix

Breeders must register their chosen prefix with the Central Prefix Register.

www.centralprefixregister.com The prefix must also be checked before registration by the CHS registrar to ensure it is not in use by any breeder in the International Caspian Studbook. Forms should be downloaded from the CPR website, filled in and sent with the fee (see list below) to the Registrar chs.registrar@dial.pipex.com (who will advise you on payment methods). If you are a breeder with a prefix already registered for use with other societies, you should extend the use to CHS by filling in the lower part of the form and returning with the fee to Central Prefix Register. The process should be complete by the time you apply to register the foal.
